From the CIO's Desk

During the outgoing month Covid-19 pandemic sent the global equity markets reeling, where the local bourse, posting a loss of 23%MoM (8752 points), was no exception. The MSCI World and EM indices were down 13% and 17% respectively, during March. The impact of Covid-19 pandemic, which has now spread across 195 countries with confirmed cases in Pakistan now exceeding 3,000, on domestic bourse was further exacerbated by substantial decline in oil prices following tanking global demand amid increasing supplies by major oil producers. During March, foreigners were major sellers in equities offloading shares worth USD84mn, while insurance (+USD60mn), Banks (+USD22mn) & individuals (+USD20.3mn) cumulatively mopped up USD102mn worth of equities. However, market activity rose significantly with average volumes rising by 47%MoM and average value traded swelling by 37%MoM on increasing local investor interest at discounted valuations.

The headline inflation for March came in at 10.2%, much lower as compared to 12.4% in the previous month. The primarily reason for the softer reading was drop in transport index (-4.4%MoM) due to downward revision in retail fuel prices, decline in some food item prices including wheat, pulses, tomatoes and fresh vegetables and high base effect of last year. During the month, SBP cut interest rates twice cumulatively by 225bp, in view of extraordinary circumstances and challenges faced by the economy from Covid-19. The central bank has also allowed regulatory forbearance on loans with measures including reduction in capital buffers, extension in loan repayment period, relaxation in provisioning rules etc. In addition to this, the federal government has announced PKR 1tr worth of fiscal stimulus in order to protect the county from the adverse impact of Covid-19 and accompanying economic slowdown.

In line with decline in policy rate, fixed income yields have also declined with 10-year PIB now trading at around 9.15% in the secondary market. Going forward, we expect inflation readings to remain soft due to subdued commodity prices along with government's decision to defer hike in utility prices.

On the external account, notable improvement has been hitherto observed with the 8MFY20 current account deficit shrinking by 71% to USD 2.8bn from USD 9.8bn during SPLY mainly due to hefty decline in trade deficit by 34%. During the same period, the overall balance of payments position posted a surplus of USD5.8bn on account of healthy financial flows. Going forward, we expect exports & remittances to suffer on account of lower oil prices and Covid-19 driven halt in global economic activity. However, weak commodity prices and lower services deficit are likely to compensate for losses on account of aforesaid two factors. Thus, we expect current account balance to remain contained going forward. However, overall balance of payments position may get precarious in view of heavy loan repayments due during the next 12 months, government's excessive reliance on now fleeing hot money flows to fund the external account and its failure to raise long-term external loans in time. We believe the government will have to renegotiate the terms of ongoing EFF program with IMF and reschedule its external loans to achieve balance of payment stability.

On the fiscal side, there is a material change in our earlier expectations that the government would successfully meet all of IMF's performance criteria for FY20. In view of the economic fallout of the global pandemic, the government may now miss one or more of its performance targets. However, we expect that Pakistan will get waiver from IMF on indicative as well as performance criteria considering the extraordinary economic fallout of COVID-19.

The KSE-100 Index has declined by 32% from its recent peak of 43,218 hit in January 2020. Despite short-term challenges, the heavy correction has opened up valuations. Even after accounting for short term demand destruction, financial ramifications of a lockdown and lower oil prices, the forward earnings multiple of the equity market comes to 6.5x, an earnings yield premium of ~5-6% over 10year PIBs relative to average historical differential of 0.7%.

We recommend our investors to invest in our equity funds as per their risk appetite and return expectations. For instance, our Al-Ameen Islamic Asset Allocation Fund (AIAAF) offers an appropriate strategy for investors with low to moderate risk tolerance. This fund invests in a diversified portfolio of stocks, bonds, and money market instruments. It has the potential to earn returns well above those on offer in Money Market and Income Funds, while limiting risk by investing no more than 40% of its assets in stocks at any point in time. For those with higher risk tolerance and return expectations, we have Al-Ameen Shariah Stock Fund, which offers pure exposure to the domestic equity market.

We strongly recommend our investors to also invest in our Voluntary Pension Scheme (Al-Ameen Islamic Retirement Savings Fund) in order to avail tax benefits, grow their long-term savings and achieve retirement security. For those with a longer investment horizon, we recommend a high exposure to Equity Sub-Fund of the Scheme. We have been following an aggressive investment strategy in this Sub-Fund considering its long time horizon and low liquidity/redemption pressures. The strategy has performed well and the Equity Sub-Fund has generated an absolute return of 362.32% (KMI-30 Index: 189.67% since inception). This translates to an average annualized return of 16.72% p.a. (KMI-30 Index: 11.34% p.a.) - thus outperforming the KSE-100 Index by a significant margin.

All investments in mutual funds are subject to market risks. The NAV based prices of units and any dividends/returns/profit lock in thereon are dependent on forces and factors affecting the capital markets. These may go up or down based on market conditions. Past performance is not necessarily indicative of future results. Capital preservation only applies to the unit holders who hold their investments until maturity date. All returns are calculated assuming reinvested dividends. The calculation of performance does not include cost of sales load.
